

Connection system based on USB Type-C

Your Advantages

Package

 Significantly smaller dimensions compared to a standard USB charging module with integrated electronics
 up to 60 % package savings in dashboard

Temperature

- In spite of high charging power only marginal heating in dashboard
 - > up to 90 % less waste heat at customer interface

Additional features possible

 \rightarrow such as lighting, temperature monitoring, real time detection $V_{\mbox{\tiny drop}}$

Use Case I – USB Charging

Data transmission

USB 2.0 High-Speed (480 Mbps)

٧...

> Power delivery specification (5 V - 20 V / max. 5 A)

Transmission length

 80 mV ground drop at 5 A with one meter cable (comparable to HSD application with 1.5 A per one meter cable)

Zusätzliche Funktionen

 $\,$ e.g. lighting, temperature monitoring, real time detection V_{drop} , etc.

Use Case II - USB Data

Data transmission

- > USB 2.0 High-Speed (480 Mbps)
- USB 3.2 SuperSpeed (Gen1 / 5 Gbps)

Transmission length

> max. 7 meters (depends on chipset)

Additional functions

power supply, USB alternate modes

Requirements & Applications

- > USB Power Delivery (100 W)
- SuperSpeed (5 Gbps)
- Additional features possible e.g. USB alternate modes
- > Data transmission > 10 Gbps

Use Case III – Data Transmission

Possible variant

- Data transmission
 parallel via 4 differential pairs
- Transmission length3 meters (depends on transmission protocol)
- Additional functions
 power supply (max. 1 A), 2 additional unshielded control lines

Possible variant

> Customer-specific applications

MD in a Nutshell

The C.A.S.E. megatrend describes the four essential future topics for the automotive industry: Connected, Autonomous, Shared & Service and Electric. Data plays a central role and drives the future of the automotive industry. Data is generated, transferred, merged and evaluated. We are experts in the transmission of the rapidly increasing data volumes and have developed the latest technological solutions for this future topic.

25

years experience in the automotive industry

100 %

automotive

Supplier of products for over 350 car models from more than 60 OEMs

Volume supplier – over 160 million products in more than 20,000 variants annually

Global production- & sales network in NAFTA, Europe and APAC

Stable ownership structure

Worldwide leading company for data transmission solutions in vehicles

Approx. **6.000** employees worldwide

Accredited in-house test laboratory
